THE "strong man" has been heard from. General Grant told a friend of his in Nevada that he hoped the necessity for his nomination would not arise."

MRS. I. K. SHARKEY, of Mississippi, is the author of Mate to Mate, a novel that has been well received by the critics and promises to be popular with the public.

An article in another column about the railroads of the country is worthy of special attention, especially of those who are inclined to a coulat in stocks and bonds.

THE heading in the New Orleans Times tells the whole story of the election in Louismua on Tuesday: "A Quiet Day and no Excitement-Lightest Vote Polled for Years -Demogratic Ticket Successful."

A DISPATCH from Huntsville states that the commissions of the United States commissioners for the northern district of Alabama, appointed prior to the October term of the court there, have, by an order from Judge Bruce, been revoked. The grounds for removal are that too many arrests have been made, and that the expenditures were too great. A nice commentary this upon Hayes's call for deputy-mar hals.

Discussing the proposed establishment in South Carolina of an educational qualification for voters, the New York Evening Post bays that "perhaps the time is coming when on educational test will be applied by all the State: Certainly we in this city would not suffer from it. Growing, Etc.

Sr. Louis, December 4 -The cane grow and grading on the Natchez, Jackson and Columbia railroad. The boom of progress C. Belcher, expert of the association, made a report giving an analysis of the various sau ples of cane and syrups submitted to him for examination and to test their sugar-produc-ing qualities. In summing up the results, Mr. Belcher says the tests made have simply been the determination of solid contents and the so-called polarization of samples. What has been shown by these methods has been of a nature to greatly encourage, even f surprise us, and in view of the fact that some termined whether there are substances pres ent in the juice of sorghum and absent in the nce of the true sugar canes which affect the polarization. In other words, it should be attled beyond dispute whether the polarization of Louisiana cane juice and the polariza-tion of sorghum juice mean the same thing.

If they do, there is no question about the value of some of the sorghum that has been grown this year. But if not, the sooner the difference is recognized and understood the The samples tested polarized from 447 to 1286 degrees, the lower degrees being unripe cane. Polarization in Cuba rates from 14 to 16 degrees, and sorghum has polarized 14½ degrees, which is something surprising. Mr. Belcher said that, so far as he could judge from the information furnished him, sandy oam soil is the best adapted for raising cane

ter. Early amber seemed to be the best quality of case to cultivate.

A communication was read from the White Water sorge association, of Peabody, Kansas, in which offers of co-operation were made and a statement that the association had twenty thousand dollars invested in the in-

An interesting report from E. P. Russell of the Sorghum sugar establishment at Crystal Lake, Illinois, was read, in which the statement is made that about forty-five thousand pounds of splendid sugar was made tained largely from unripe cane. The report also says: "The experience we have had at our works this season convinces us that with proper machinery and juice weighing ten degrees bauma, we can grind cane one day and have sugar made from that cane ready for market the next day, and not have to carry stock six months before the sugar is ready

whenever, in view of the great importance to the country at large of the development of sugar frain long cane in the central and northern States of our country, so as to meet all the demands of our people and save to them over one hundred millions annually paid for fore go sugars, and in view of the further fact that for the successful development of this industry skilled expert labor is needed, but which is not now obtainable.

Resolved, That the department of raiculture be carnestly arged to obtain from congress sufficient appropriation to establish departments of instruction in the growing of cane and the manufacture of the same into sugar, in connection with the agricultural colleges of the country.

Resolved, That the legislatures of our respective States be also appealed to, to extend aid to their agricultural colleges for the better and further development of this industry.

Key, postmaster-general, in which an injunction is sought to prevent the latter from enforcing an order directing that letters addressed to the agent of the lottery to be withheld from delivery. The complainant was represented by Senator Carpenter and Judge Bartley, but no counsel appeared for the postmaster-general. Judge Bartley said that they-were ready to present their case, but no answer had been filed on the other side, and that they did not wish the matter disposed of by default. Chief-Justice Carter anid that if they intended to carry the case to the United States supreme court, it "might as well be chalked." Senator Carpenter said that they did not want any "chalking," and that he was satisfied that when the court should hear the case, it would grant the in junction asked for. After consultation the case was set down for Saturday. A STATUE FOR CUSTER.

For Nine Years Cured when all other Remedies Failed. MESSES, WEEKS & POTTER—Gentlemen: Since July last I have been using your Cuticura for Scald Head, and it has cured me when all medicines that I have taken for nine years did me no good. I am now using it as a hair dressing, but my head is well. It keeps the hair in very nice condition. Yours truly.
